

Real-world STEM competitions. Real careers begin here.

A cradle-to-grave STEM community of practice — connecting students, educators, universities, and industry.

01 STELLR AT A GLANCE

Stellr Education is a registered 501(c)(3) non-profit running real-world STEM competitions that bring students and professionals together to build skills, relationships, and career pathways. We simulate industry through multi-disciplinary design competitions — engineering, science, communication, and strategy working as one — mentored by industry professionals in the engineering and scientific fields.

We call it a cradle-to-grave STEM community of practice: a single network that removes the opacity between high school, college, and professional life, so young people can see — and step onto — a STEM career trajectory long before they have to commit to one.

OUR MISSION IN ONE LINE

"To provide tomorrow's professionals with the skills, relationships, and career trajectories they need to succeed."

— David Shaw, Founder, Stellr Education

WHAT SETS US APART

Real Industry Alignment

Students tackle authentic, open-ended challenges, not textbook problems.

Professional Mentoring

Practising experts are a core part of our competitions and activities.

AI Is a Tool, Like Any Other

We train participants to quantify how they use AI and the benefit their team receives — not just use it.

Global Impact, Regional Focus

We love working in STEM-underserved communities — rural, regional, or urban.

02 THE STELLR NETWORK

The premier global community of practice we're building — connecting the organisations that shape STEM career trajectories. Its strength lies in the breadth and variety of its members. One network, three ways to belong:

Education Service Providers

Running events, curriculum, or educator training, middle school through college.

Universities

Colleges & universities, especially regional and land-grant institutions serving their local communities.

Corporate Partners

From independent contractors to multinationals, shaping careers and looking to nurture talent.

03 WHY JOIN — BENEFITS OF PARTNERSHIP

Partnership is built to be mutually beneficial. Every partner receives the core benefits below; each conversation leads with the ones that matter most to your organisation.

A truly global network — your students, people, and brand connect to a worldwide STEM community.

Idea cross-pollination — share and learn in a safe, collaborative community of practice.

Mission-aligned impact — measurable contribution to STEM access in underserved communities, ready for your CSR / impact reporting.

A larger voice — we actively promote partners across all Stellr platforms.

Talent pipeline access — visibility of, and connection to, the next generation of STEM talent.

Education Providers

- **Offer more value** to your participants.
- **Operational support** — our tools and systems from day one.
- **Peer learning** — see what your peers are doing.

Universities

- **Local engagement** — support in-state networking and recruitment.
- **College mentoring** — Academy and Community access for your students.
- **Strengthen STEM credentials** across the community.

Corporate Partners

- **Long-term CSR impact** — measure impact at high school, not just college.
- **Recruitment nurturing** — build your talent pipeline early.
- **Flexible sponsorship** — event, regional, or member-based.

04 PARTNERSHIP INVESTMENT

We keep requirements minimal — built to protect students and align on mission — and offer flexible ways to join, from in-kind contributions to paid sponsorship. Start with what works for you.

	RECOMMENDED	
Bronze Event Supporter \$1,900 Contributor to one USA event · Speaking position · Brand & business visibility · Community engagement points	Silver Named Event Sponsor \$2,850 Named Sponsor of a regional USA event · Branding rights · Month-long social engagement · Ongoing member community access	Gold Named Competition Sponsor \$23,000 Named Title Sponsor of one of two nationwide Competitions · Year-round engagement · School & student sponsorship · Guest speaking · Long-term alumni network access for recruiting

In-kind / Flexible — by arrangement
 We rely heavily on in-kind support — facilities, equipment, mentoring, or volunteering all help keep our competitions accessible.

05 HOW TO JOIN

Joining is simple. Tell us about your organisation and we'll find the right way for you to belong.

- 1 Get in touch**
 Email hello@stellrededucation.org or complete the form at www.stellrededucation.org/network.
- 2 Discovery conversation**
 A short call to understand your goals and the best-fit partnership.
- 3 Confirm & onboard**
 We welcome you aboard and begin promoting you across the Stellr network.

Ready to move the STEM flywheel?
